

## GSMA Mobile World Congress 2016

**Teclib'** - Software Editor, represented by its branch **Nov'IT**, will attend the [GSMA Mobile World Congress](#) from the 22<sup>nd</sup> to the 25<sup>th</sup> of February 2016 - at the [Fira Gran Via](#) in Barcelona, Spain.

The MWC has been the biggest annual convention for mobile industry and related businesses, during the past 20 years. Last year, the exhibition attracted around 94,000 attendees and more than 2,200 worldwide companies. This 21<sup>st</sup> edition is a great opportunity to find more about the latest trends and technologies in the mobile industry, to create networking opportunities and to come across award-winning solutions.

For the third year in a row, **Teclib'** will be in the middle of all congress activities, to introduce **Nov'IT** secure mobility solution: **UHURU MOBILE**.

[Uhuru Mobile](#)\* is a **complete secure and controlled OS solution** for Smartphones, Tablets and Android-based PCs. Our Operating System **protects** devices **from any malware** and **vulnerability exploits**, by using both a dynamic and a behaviour-based analysis.

Uhuru also provides a **depiction system for GPS location**, includes a **secure market of 450 applications**, a **user data protection**, and a **centralized console** for terminal fleet management.

*\*Result of R&D works, carried out within the DAVFI project and designed to create a comprehensive security solution. This project was supported and partly funded by the French Fund for a Digital Society (FSN).*

**Join in now to discover all Uhuru's features and functionalities at MWC!**

You will find us in **Hall 5 (French Tech Area) - Stand 5B41 - NOV'IT**. Our team of IT experts will be more than pleased to meet you and respond to any of your requests.

If you are interested in a meeting to learn more about Teclib' technology, **please let us know so we can set-up a meeting.**
